Dear Parents and Carers,

At Albrighton Primary School and Nursery, we know that there are occasions when children wake up feeling a little under the weather but are still well enough to attend school. As a school, we want to ensure that we can provide appropriate care and support for these children while maintaining good attendance wherever possible.

To help us do this, we have introduced a new **Wellbeing/Under the Weather Check-In Form**, which can be completed by parents and carers when their child is attending school but may not be feeling quite their usual self.

The form allows you to share important information with us about how your child is feeling, any symptoms they may be experiencing, any medication they have already received, and any additional support they may benefit from during the school day. This information will help staff to monitor your child's wellbeing and provide reassurance, encouragement, or other appropriate support if needed.

The form can be accessed at any time through the **Parents Area** of our school website under the **Attendance** page.

Please note that this form is intended for children who are well enough to attend school but may benefit from additional awareness or support from staff. If your child is too unwell to attend school, normal absence reporting procedures should still be followed.

We hope that this simple process will help us continue to work together to support the health, wellbeing, and success of every child.

Thank you for your continued support.

Kind regards,

Karen Tearle Eleanor Chambers
